Code Breaker - Whats Up
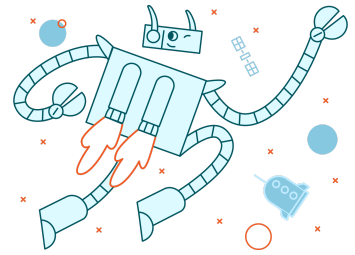

// Sparking Challenge Code Breaker

Example

Your code should have the following output:

```
countUpperCaseLetters("heLLOOOo")
> 5
```

Description

Great! Now we can tell which characters are uppercase! This will allow us to begin our implementation of the frequency analysis logic of our code breaker.

Let's start to count the total uppercase letters that we have in the textarea.

You are to:

- Create a function that counts and returns the total number of **Uppercase** letters in the given text.
